SOFTWARE ENGINEER

Dear Hiring Manager,

I am writing to apply for the Software Engineer position. I am a first-year Bachelor of Science in Information Technology student at PHINMA Araullo University. I am interested in technology and software development, and I am eager to apply what I have learned in my studies while gaining practical experience in the field.

During my studies, I have been developing my knowledge of information technology, problem-solving, and basic application planning. I have also worked on an academic project called the Student Excuse and Absence Request Management System, which helped me understand how technology can be used to organize information and address real-world needs.

Aside from my studies, I have practical skills in motorcycle repairing, baking, and cooking. These activities have helped me develop patience, attention to detail, creativity, and the ability to follow instructions. I am also willing to learn new technologies and improve my technical skills.

I am a motivated, hardworking, and adaptable student who can work independently or as part of a team. I am willing to undergo training and continue learning to improve my skills and contribute positively to your organization.

Thank you for considering my application. I would appreciate the opportunity to discuss how my skills, willingness to learn, and educational background can contribute to your team. I have attached my resume for your review.

Sincerely,

Barrera, Mhike Jullian
Applicant

PROCESS & INTEGRITY NOTE:

PROCESS & INTEGRITY NOTE:

For my application as an Associate Software Engineer, I searched for an opportunity that matches my course, BS Information Technology. I looked for job postings from reputable companies and selected Accenture because the role involves application development, software programming, system problem-solving, and other skills related to my field of study.

To check the information, I reviewed the job posting and examined the listed position, responsibilities, qualifications, company, and location. I also checked the details shown on the hiring post to make sure the opportunity and application information were clearly identified.

I used the job posting as the basis for my resume, cover letter, and application documents.
